DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Invention I, Species VI in the reply filed on 4/9/2008 is acknowledged.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 10/29/2004, 2/22/2005, and 2/15/2007 are in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner has considered the information disclosure statements.

Specification

The abstract of the disclosure is objected to because it contains the word "comprising". Correction is required. See MPEP § 608.01(b).

The use of the trademark NETPAGE has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 20-28 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 11-18 of U.S. Patent No. 7024941 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the ink compositions of the patented claims fully embrace the compositions of the instant claims in an anticipatory manner.

Claims 20-28 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1- 7 of U.S. Patent No. 7282164 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the ink compositions of the patented claims fully embrace the compositions of the instant claims in an anticipatory manner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Albert et al (US 5282894 A).

Albert discloses the following claim limitations:

An ink containing an IR-absorbing metal-dithiolene dye (column 1, lines 5-16) containing a dye pre-selected from a metal-dithiolene of formula (II) wherein M is Ni, j is 1, k is 2, n is 1, W is of formula $\text{CH}_2\text{SO}_3\text{H}$, $\text{CH}_2\text{SO}_3\text{Na}$, or $\text{CH}_2\text{SO}_3\text{K}$, up to three CH_2 groups in the carbocycle may optionally be replaced by N, and up to four H atoms in the carbocycle may be optionally replaced by a group independently selected from C_{1-6} alkyl, C_{1-6} alkoxy, C_{1-6} aryl, C_{1-6} arylalkyl, halogen, hydroxyl, or amino (column 3, lines 12-50).
